About Nur Solutions

Practical technology and digital transformation for real operating environments.

Nur Solutions is a forward-thinking technology and digital transformation company providing software, consulting, and business solutions that help organizations improve performance, streamline operations, and create sustainable value.

Our focus is practical technology: systems that fit the way businesses in East Africa actually operate. We work across ERP, custom business applications, manufacturing systems, web and mobile development, consulting, and ongoing support.

OUR POSITIONING

Software built for how East African business actually works.

Business Efficiency

1

Reduce operational friction and improve visibility.

Integrated Systems

2

Connect functions and information across the organization.

Practical Innovation

3

Use modern technology to solve real business problems.

Long-term Support

4

Stay involved beyond deployment and go-live.

Our Core Values

The standards that shape how we build, communicate, and partner.

Client Focused

01

We put our clients' goals at the center of every solution we build.

Quality Driven

02

We hold ourselves to high standards in every line of code and every deliverable.

Innovative Solutions

03

We bring modern technology and fresh thinking to solve real business problems.

Long-term Partnership

04

We aim to grow alongside our clients, not simply complete a project and move on.

Honesty

05

We value clear communication, realistic expectations, and straightforward business relationships.

Transparency

06

We keep clients informed about progress, decisions, scope, and delivery.

Mission & Vision

A clear direction for the company and the organizations we serve.

OUR MISSION

To deliver innovative and reliable solutions that empower businesses to grow, optimize operations, and create lasting value.

OUR VISION

To be a trusted technology partner and a leading provider of smart business solutions in the region and beyond.

WHAT DRIVES US

Local understanding

Solutions shaped around real operating environments.

Scalable thinking

Systems designed to grow with the organization.

Reliable delivery

Clear implementation, handover, and ongoing support.

Our Services

A connected set of software, consulting, and support capabilities.

ERP & Business Systems

1

Finance/accounting, HR/payroll, inventory management, integrated operations, and reporting.

Manufacturing ERP

2

Production planning, inventory and material tracking, supply-chain visibility, and quality-control workflows.

Custom Software Development

3

Requirements, architecture, full-stack development, integrations, documentation, and handover.

Web & Mobile Development

4

Responsive websites, mobile applications, PWAs, and performance-focused digital experiences.

IT Consulting

5

Technology audits, vendor/tool selection, systems architecture reviews, and digital transformation roadmaps.

Maintenance & Support

6

Bug fixes, updates, uptime monitoring, security patching, and priority support.

Business & Manufacturing Systems

Systems that connect operational information and management visibility.

ERP & BUSINESS SYSTEMS

Finance/accounting, HR/payroll, inventory management, integrated operations, and reporting — structured around how the organization works.

MANUFACTURING ERP

Production planning, inventory and material tracking, supply-chain visibility, and quality-control workflows for manufacturing operations.

WHAT THIS ENABLES

- Better visibility across business functions and operational data.
- More connected workflows instead of disconnected tools.
- Reporting that supports management decisions.
- Systems that can evolve as the organization grows.

Software, Web & Consulting

From custom applications to digital roadmaps and ongoing support.

CUSTOM SOFTWARE DEVELOPMENT

Requirements and architecture, full-stack development, existing-system integrations, documentation, and handover.

WEB & MOBILE DEVELOPMENT

Responsive websites, iOS and Android applications, PWAs, and performance-focused digital experiences.

IT CONSULTING

Technology audits, vendor/tool selection, systems architecture review, and digital transformation roadmaps.

MAINTENANCE & SUPPORT

Bug fixes and updates, uptime monitoring, security patching, and priority support after deployment.

Industries We Serve

Our solutions are shaped around the processes, data, and decisions of each organization.

Retail

Manufacturing

NGOs & Nonprofits

Finance & Accounting

Government

Logistics

Healthcare

Education

Agriculture

DESIGNED AROUND BUSINESS REALITY

From manufacturing floors to service organizations, our systems are designed to connect people, processes, data, and management decisions in one practical operating environment.

Why Choose Nur

What clients can expect from the way we deliver technology.

1

Experienced Professionals

Skilled team with practical industry knowledge.

2

Tailored Solutions

Custom solutions designed around business goals.

3

Reliable Support

Support continues beyond implementation.

4

Proven Results

Systems built to improve visibility and business performance.

Our Approach

A four-step process designed to move from understanding to dependable delivery.

01

Discover

Understand your business, challenges, and goals.

02

Plan

Design the right solution for your needs.

03

Deliver

Build, implement, and ensure smooth deployment.

04

Support

Provide continuous support and drive long-term success.

FROM DISCOVERY TO LONG-TERM SUPPORT

We structure delivery so that the solution is understood before it is built, implemented with a clear handover, and supported after go-live.

Selected Solutions

A snapshot of systems we've built across SaaS, e-commerce, education, inventory, automotive, and business operations.

SELECTED WORK

01

Health Checks System

SAAS • MONITORING

Real-time server health and uptime dashboard with secure sign-in, configurable health checks, and service-status visibility.

02

E-Learning Platform

EDTECH • LMS

Role-based learning platform connecting instructors and students, with course management and progress tracking.

03

Noorline Trading

E-COMMERCE • AESTHETIC

Product storefront and ordering platform with catalog, inventory tracking, and an admin management dashboard.

04

Stardent Trading

HEALTHCARE • E-COMMERCE

Medical-supplies commerce platform with product ordering, inventory management, and internal admin operations.

05

Urji IMS

INVENTORY • MANUFACTURING

Inventory and sales system tracking raw materials, finished stock, daily sales, and operational activity in one dashboard.

06

Jcarmall

AUTOMOTIVE • ERP

Digital dealership platform with vehicle listings and inquiries, plus internal finance, accounting, stock, and sales operations.

FEATURED PROJECT

Rona AI-POWERED FACTORY MANAGEMENT

A full-stack factory management platform bringing HR, production, inventory, finance, and maintenance together — with an AI assistant that understands the factory's own operational data.

Frequently Asked Questions

Clear answers to common questions about working with Nur Solutions.

● How do we get started?

Reach out through our website, phone, or email. We'll schedule a discovery call before proposing a plan.

● How long does a project take?

Timelines vary by scope and complexity. After discovery, we provide a clear estimate.

● Do you support clients after launch?

Yes. Maintenance & Support keeps systems secure, updated, and running smoothly after go-live.

● Can you work with existing systems?

In most cases, yes. Our ERP and integration work is designed to fit into and improve existing systems.
